

## RFID HeadlightStickers™

HeadlightStickers™ are non-transferrable passive (battery-free) RFID transponders for automatic vehicular identification. Each sticker is powered with energy from the reader. Upon removal, it is rendered ineffective to prevent theft or unauthorized transfer or sharing of credentials.

Specifications	
Dimensions	3.8" by 0.5"
Frequency	915 ± 13 Mhz
Encoding	26-bit Wiegand
Operating Temperature	-40°F up to 185°F
Relative Humidity	Up to 95% RH
Programmable Data Retention	10 years

**Break on Removal Security:**  
Renders devices unusable when they are peeled from a vehicle.

### Durability Features:

- Water resistant
- Impact resistant
- Long lasting adhesive
- UV-stabilized to withstand prolonged sunlight
- Rated to operate in extreme temperatures
